❖ SUMMARY

Computer Science student with practical experience in MERN stack, Generative AI, RAG systems, and cloud deployment, focused on building scalable backend systems with Strong Problem Solving Ability.

❖ EDUCATION

Utkal University , Radhanath Rath Vigyan Degree Mahavidyalaya
Bachelor of Science in **Computer Science**, Minor in Physics (Current Status : 3rd Year)

CGPA: **8.7** (Second Year)
Aug 2023 – Mar 2026

❖ PROJECTS

❖ AI Library – Modular Agentic AI Framework

Tech: Python, FastAPI, LangGraph, Gemini/OpenAI API, Neo4j, MongoDB, Docker

- Built a **modular AI library** supporting multiple agents including chat agents, voice agents, and memory-enabled agents.
- Implemented **agent orchestration using LangGraph**, enabling chained reasoning, tool usage, and multi-step workflows.
- Developed backend-first architecture with **pluggable LLM providers (Gemini/OpenAI)** and containerized services using Docker.

❖ Meena GPT – AI Chat Application

Tech: React.js, Node.js, Express.js, MongoDB, Gemini API

- Refactored and optimized the full-stack architecture, reducing code complexity by 25% and improving long-term maintainability.
- Designed structured RESTful APIs and used MongoDB for efficient and scalable data management.
- Deployed the application on Render, gaining hands-on experience in cloud deployment and **CI/CD** pipelines.

❖ Confer-X Video Conferencing Platform

Tech: React.js, Node.js, Express.js, MongoDB, WebSockets, REST APIs

- Built a **real-time video conferencing platform** with AI-driven transcription, summarization, and meeting insights.
- Integrated **Generative AI pipelines** to generate automated meeting notes, action items, and sentiment analysis from live meetings.
- Designed a **scalable backend architecture** using WebRTC and Socket.io to support low-latency communication across multiple concurrent rooms.

❖ StockMates – Stock Trading & Investor Networking Platform

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs

- Built a **real-time stock trading simulation platform** with live price updates, order execution, and portfolio tracking.
- Designed **investor networking groups** enabling discussions, strategy sharing, and market insights using real-time communication.
- Designed a **robust backend system** to handle trade lifecycle, order validation, and transaction history at scale.

❖ SKILLS

- **Languages:** Java, Python, JavaScript
- **Backend:** Node.js, Express.js, REST APIs
- **Frontend:** React.js, HTML, CSS , Material UI , Bootstrap , Tailwind CSS
- **Databases:** MongoDB, MySQL
- **DevOps:** Docker, Kubernetes, GitHub Actions
- **AI:** LLMs (OpenAI, Gemini), RAG Systems,,Agentic AI , LangGraph, Prompt Engineering
- **Cloud:** AWS, Render, Vercel

❖ ACHIEVEMENTS

- Achieved global rank 1421 among 20,000+ participants in a weekly LeetCode contest.
- Solved 500+ DSA problems across LeetCode and GeeksforGeeks.
- Cleared multiple HackerRank skill certifications, demonstrating strong programming proficiency

❖ CODING PROFILES

- **Leet Code :** <https://leetcode.com/u/SATYAJIT-SAHOO/>
- **GeeksforGeeks :** <https://www.geeksforgeeks.org/user/satayajitsaf4tx/>
